Applicant has filed a substitute specification as a result of the examiner's objection to the originally filed specification. This specification has not been entered and the objection to the specification stands, as request for entry of the substitute specification has no statement that no new matter has been added and as such, is not in compliance with 37 CFR 1.125(b).

The disclosure is objected to because of the form of the specification for example that portion spanning pages 76-105. Beginning with the section labeled ADDITIONAL EMBODIMENTS on page 76 there are numbered paragraphs which appear to be in the form of claims, and refer back to prior paragraph numbers with the referent "claim" but do not appear to be intended to be claims as they are in the section preceding the legend "What is claimed is" and some (e.g. 141) are not in single sentence form and make reference to drawing figures. Further the section labeled "I claim" does not have the recitations therein commencing on a separate page. Applicant should extensively amend the disclosure to put it in proper form.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 21-23, 25, 28, 29, 31, 33-35, 37-40, and 45-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 21, the recitation "an intermediate substance in contact with the target area of skin" specifically recites the skin as part of the device, and as such claims the body, thus this claim is indefinite. Amending the claim to read, in pertinent part "an intermediate substance adapted to contact the skin" would remedy this deficiency.

Claims 21-23, 29, 31, 33-35, 37, 45, 47, and 48 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Neev (WO '438).

See Figures 13A-E, and the disclosure associated therewith.

Claims 25 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neev (WO '438). Neev (WO '438) teaches a device as claimed except the particular intermediate substance. It would have been obvious to the artisan of ordinary skill to employ the various intermediate materials such as agar and tracing paper, since these are equivalents to the liquids and solids of Neev (WO '438) as they can all conform to the tissue surface and retain an absorbing substance; are not critical; and provide no unexpected result, thus producing a device such as claimed.

Claims 38-40 and 49-54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neev (WO '438) in combination with Baker et al. Neev (WO '438) teaches a method as claimed except the removal of blemishes. Baker et al teach the desirability of removing blemishes by ablating very thin layers of tissue. It would have been obvious to the artisan of ordinary skill to employ the thin layer of tissue removal steps of Neev (WO '438) in the method of Baker et al, since this allows the ablation of extremely thin layers of tissue and thus affords greater precision in tissue removal, or to employ the blemish removal method of Baker et al in the method of Neev (WO '438), since this would provide the dual functionality of removing the blemish, while still enabling the removal of analytes, or, alternatively, the infusion of drugs which would help treat the blemish, and to employ other forms of energy such as electron beams and X-rays, since this is not critical; is well within the skill of one having ordinary skill in the art; and provides no unexpected result and can be absorbed to create heat, thus producing a device such as claimed.

Applicant's arguments with respect to claim s 21-23, 25, 28, 29, 31, 33-35, 37-40, and 45-54 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
